EX1: Book shop CRUD with Local storage

The application interface consists of two main parts: a sidebar for adding new books and a grid for displaying existing books.

Left Sidebar (Add Book Form):

- Name:** Input field containing "c programming".
- Price:** Input field containing "1000".
- Category:** Input field containing "coding".
- Add:** A yellow button to submit the new book information.

Right Grid (Book List):

The grid displays a list of books in purple cards. Each card contains the following information:

- Name :** The book's title.
- Price : riels** The book's price in riels.
- Category :** The book's category.
- Edit** and **Delete** buttons for managing the book.

The grid shows 7 books in total, arranged in two rows (4 in the top row, 3 in the bottom row).
